Nowadays many people believe that it is important to practise a sport regularly when you are in your teens. In my opinion, they are absolutely right.

First of all, sport improves our physical and mental health. As we all know, in the age of 13-19 many significant changes <sup>in our bodies</sup> take place. Children grow up and become adults; it means that it is a strenuous period for their bodies. Scientists believe that regular practise in sport helps a lot. Sport increases stamina and strength and even helps to think faster. All these factors make students studying ~~ing~~ better and easier.

Secondly, there is a common belief that teenagers who practise a sport regularly have better relationships with their parents and counterparts, rather than the ones who do not. This effect is now being studied by many scientists and psychologists from all over the world. - It means that in future we will know much more about it.

Finally, ~~sport~~ doing sport while being teenagers has a good effect on people in <sup>their</sup> future and helps to avoid many serious diseases when people get older. Some positive <sup>results</sup> ~~effects~~ of <sup>doing</sup> sport like fast metabolism have a long-lasting effect.

In the conclusion I can say that doing sport is very important in any age, especially in ~~teenage~~. the age of teens. It has a good effect on health and fitness, social life and <sup>the</sup> future.

How important is it to practise a sport ~~regularly~~ regularly when you are in your teens? I'm going to write about it in my essay.

Firstly, It's good for your health and it helps you to keep fit. When you are a teenager, you can eat a lot and it won't cause at you too much, but <sup>on</sup> when you are getting older, it changes, and you have to work at your body and eat healthy food to keep fit and have a good health. That's why I think you should start doing exercises earlier, when you are a child, to make it easier to do it, when you grow up.

Secondly, if you ~~are doing~~ sports, you will have more friends, because usually if you start doing it, you usually coming to a sports section, where some people are already training. They will discover things they never knew about you, and it will make the friendship stronger and enable you to form a closer bond with your new friends.

Lastly, you will be able to make a new hobby or even a your dream work. ~~Especially to me~~ This summer I started to ride a bicycle, and now it's my number one hobby. I can ride a fifty, even a hundred kilometers, ~~and~~ it will be hard, but I love it, I can forget about my problems, when I cycle, and that's great.

In the conclusion I won't to say, that it's very important to train, because it will help you and it will make your life closer to perfect.

Sport has always been an important part of ~~part~~ our lives. It has lots of advantages.

We are teenagers, we are the future generation and we should be healthy and strong. That's why we have PE lessons at school. Our cardio system needs regular exercises to be able to serve us longer. Our muscles should be strong to be able to carry heavy stuffs.

Team sport is a great way to make new friends. It also teaches you to build healthy relationship with people.

In my opinion, sport helps to express you feelings. When you are a teen, you have a big social pressure, you need to study hard, your body is changing and you don't know what to do with all your problems. When you do sport, you share your energy, you feel exhausted, but free.

Physical activity helps our brain to work harder, what is very important for teens because of the school, tests and exams. Teens stop ~~the~~ worrying about school problems during exercises and it helps them feel better.

In conclusion I would like to recommend teens spend more their free time doing exercises for their health and go better mood.
